The Fig. 7, originally consisting of 4 panels, was truncated in the printed version (the last panel was missing). The complete version is printed again.

¹ Deceased.

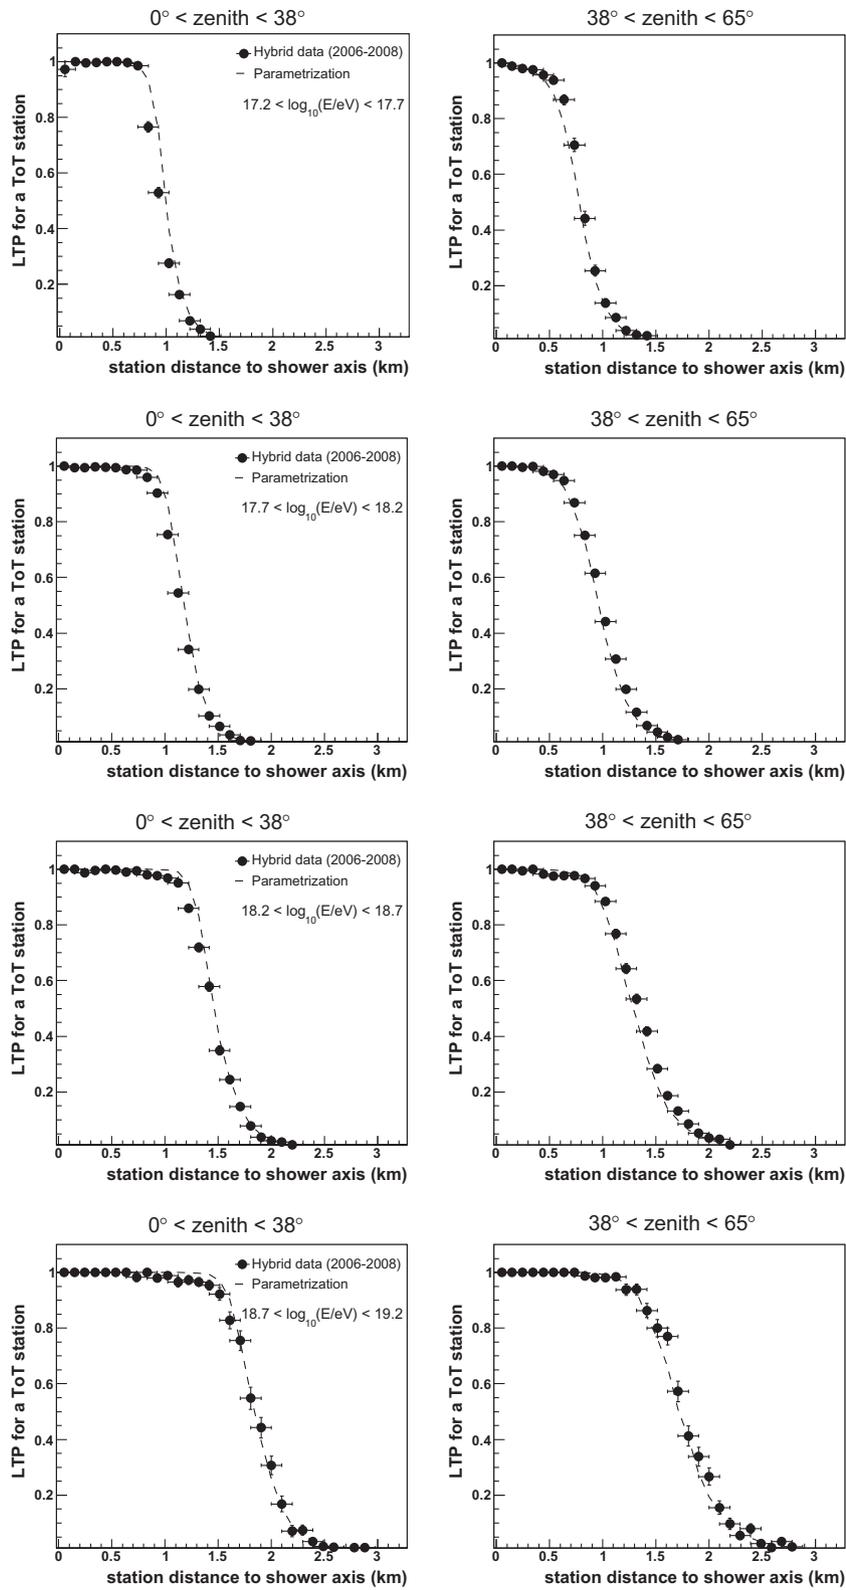

Fig. 7. Comparison of simulation with hybrid data collected in 2 years. Zenith angles are split in two ranges 0° to 38° (left) and 38° to 65° (right). From top to bottom the energy intervals are $10^{17.2} < E < 10^{17.7}$ eV, $10^{17.7} < E < 10^{18.2}$ eV, $10^{18.2} < E < 10^{18.7}$ eV, $10^{18.7} < E < 10^{19.2}$ eV.
