Dear Hugh,

We are pleased to inform you that your submission White-light flares: A TRACE/RHESSI overview has been accepted for

publication in Solar Physics. Congratulations!

However, before your paper can be forwarded to our Production Department, you are requested to make the corrections as suggested by the Reviewer and the Editor.

In order to submit your corrected manuscript, please access the following web site:

<http://sola.edmgr.com/>

We look forward to receiving your final version of your manuscript.

With kind regards,

Lidia van Driel-Gesztelyi
Editor

Comments from the Editor:

Please change running headers: Wolfson et al. -> Hudson et al.

In the abstract spell out the full name of TRACE and RHESSI when you mention it for the first time, with the abbreviation to follow in parentheses. Leave the citations to the text. This implies the removal of the two footnotes on p. 1. When these names are repeated, abbreviation is fine...

Figure captions:

In figure captions references to positions of parts of the figures and explanations of the meaning of symbols should be in italic. E.g. *{\it (dotted)}* and *{\it (solid)}* in the caption of Figure 1; *{\it upper}* and *{\it lower}* in Figure 2; *{\it Left-hand panels}* and *{\it right-hand panels}* in Figure 3; *{\it solid lines}* and *{\it dotted lines}* in Figure 4; etc... check the captions of Figures 7, 8, 9 and 11.

Typo: *relati.ve* in the caption of Figure 9.

References:

Please remove the paper titles from the list. It is a very informative addition, but tradition in SP is that we don't put them in... we may change this in the future, but we have to keep presently valid rules...

In the text papers with up to three authors: all authors should be named. Please change:

Neidig et al, 1993b -> Neidig, Wiborg and Gilliam 1993 on p. 2.
This implies that Neidig et al. 1993a will become Neidig et al 1993 (e.g. on p. 14).

Machado et al., 1989 -> Machado, Emslie and Avrett, 1989 (on p. 12)

In the reference list the first six authors of papers must be named, "et al" may follow after that. Please list five more authors of Handy et al and Lin et al.

In the list of references Solar Phys. uses the abbreviations *Astrophys. J.* (not *ApJ*), with a dot indicating abbreviation.

Gurzadyan - at the end "1980" is redundant and what is "Rev. ed"?

Lin et al, remove ending page number.

Metcalf et al, remove ending page number.

Svestka, 1976: at the end "1976" is redundant.

Exchange the order of Neidig et al., 1993 (ex-1993a) and Neidig, Wiborg and Gilliam, 1993 (ex-Neidig et al., 1993b).

Finally, I was surprised that the authors did not cite the Yokoh WLF catalogue by Matthews et al. (2003, A&A 409, 1107) on p. 2, where the gradual nature of some WLF patches is mentioned. It would be a relevant reference...

Reviewer: There are three remaining typos, but otherwise this is fine.

Second last line of the abstract: supportthe

Penultimate paragraph of the introduction: missing bracket after (1992)

Conclusions: higly localized
